

Serial No.: 09/992,070

REMARKS

Applicant's invention is set forth in pending claims 1-3.

In the Official Action mailed June 10, 2004, the Examiner requires a new title which is clearly indicative of the invention to which the claims are directed.

The Examiner further rejects the claims under 35 USC 112 ¶2. In that regard, the Examiner states that the rejection is based on presence of the limitation "said medium protection data" at lines 20 of claim 1, as well as at lines 1-2 and 2 of the recitation of claim 2 and 3, respectively.

Additionally, the Action rejects the claims under the judicially created doctrine of obviousness-type double patenting over claims 1-6 of U.S. Patent No. 6,212,329 B1 and its 34 other continuations. Addressing the rejections, *seriatem*, applicant submits as follows.

Upon reviewing the Examiner's requirement, the claims and the disclosure, applicant provides herein a new title which is believed more closely to correspond to the subject matter recited in the claims.

Additionally, by amendment of claim 1 to bring lines (presently) numbered 4, 14, 17 and 19 into conformity with presently numbered line 22 (originally numbered 20) of claim 1 and with presently numbered lines 2 of claims 2 and 3 (originally also numbered 2), the application is amended to eliminate the basis for objection to, or rejection of, the claims for "insufficient antecedent basis" set forth in the action, thus eliminating said basis. However, notwithstanding the foregoing amendment, it is courteously submitted that reconsideration of the rejection based on 35 USC 112 ¶2 is in order, as an assertion of

Serial No.: 09/992,070

“insufficient antecedent basis” does not rise to the level of a statutory rejection under 35 USC 112.

More specifically, 35 USC 112 ¶2 requires that “the specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.”

The Action merely refers to “insufficient antecedent basis”. Applicant respectfully submits that the claim recitation, as is easily appreciated by one of ordinary skill in the art who has read the specification, clearly points out and distinctly claims the inventive subject matter. Indeed, whether or not the claims include “insufficient antecedent basis”, such an assertion fails to demonstrate a statutory deficiency in the claims, or to demonstrate that the claims fail to meet the requirement for “pointing out and distinctly claiming the subject matter”.

In any case, upon entry of the amendment, the basis for objection to the claims will have been overcome.

Additionally, upon reviewing the claims, it is apparent that, as clearly set forth at line 1 thereof, claim 1 relates to a “decoding protection method”, as do each of the dependent claims. Accordingly, claim 1 is amended at line 6 to refer to “limiting ~~reproduction~~ decoding”, and claims 2 and 3 are amended at line 1 of each, to correct inadvertent reference therein to a “reproduction protection method” in order properly to refer to a “~~reproduction~~ decoding protection method” in accordance with the antecedent recitation in the parent claim thereof.

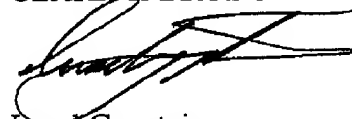

Serial No.: 09/992,070

It is courteously submitted that, inasmuch as the amendment provided herein does not add new matter and is supported by the specification, even cursory review of the amendatory language will suffice to demonstrate the propriety of the amendment as well as patentability of the amended claims.

As to the rejection under the judicially created doctrine of obviousness-type double patenting over claims 1-6 of U.S. Patent No. 6,212,329 B1 and its 34 continuations, a Terminal Disclaimer is filed herewith and identifies the '329 patent and its 34 other copending applications, thereby to overcome the rejection.

Having thus eliminated or overcome all bases for rejection of or objection to the application or any of its components, and in view of the foregoing, it is respectfully submitted that the application is in condition for allowance and an early indication of the same is courteously solicited. The Examiner is respectfully requested to contact the undersigned by telephone if any further comments, questions or suggestions arise in connection with the application.

Respectfully submitted,
CLARK & BRODY
